

# Smallest number between 3 number

[ÉDITER](#)

## Énoncé

### 🎯 Goal

You will be given `a`, `b` and `c` as your inputs and you need to write a program to find and print the smallest number between these three.

### Input

**Line 1:** An integer `a` for the first number.

**Line 2:** An integer `b` for the second number.

**Line 3:** An integer `c` for the third number.

### Output

**Line1:** Print smallest number
